

STUDYPULSE: Grade and Wellness Tracker

By Miguel Tan, Nobu Higum, and Jace Perante

StudyPulse is a project meant to make studying for tests way easier and less stressful. All you do is type in your current grade, what grade you want to get, and when your test is. The program then tells you the exact score you need on the test to reach your goal. It also gives you a daily study plan based on how hard the subject is, so you can stay on top of things instead of cramming the night before.

Project Objectives

- Find Required Grades: Calculate the exact score you need on an upcoming test to reach your goal grade.
- Organize Study Schedules: Give you a daily study plan based on how hard the subject is and how many days you have left.
- Reduce Test Stress: Help students stay organized and avoid last-minute cramming before big exams.

Features

- Required Exam Grade Calculator: Figures out what grade you need on your upcoming test based on your current grade, your goal grade, and how much the test is worth.
Study Time Estimator: Works out how many total and daily hours you should study by looking at how hard you rated the subject (1 to 5) and how many days you have left.
Simple Screen Menu: Prompts you step-by-step in the terminal to enter your information and displays your results clearly.
- Reality Check Alerts: Gives you a heads-up if your target grade requires an impossible score (like needing over 100% on a test) or if the suggested study hours are too high for one day.
- Multi-Subject Tracker: Lets you enter information for several classes in one go so you can see which subject needs your attention most.

Requirements

- Python 3

Inputs Needed

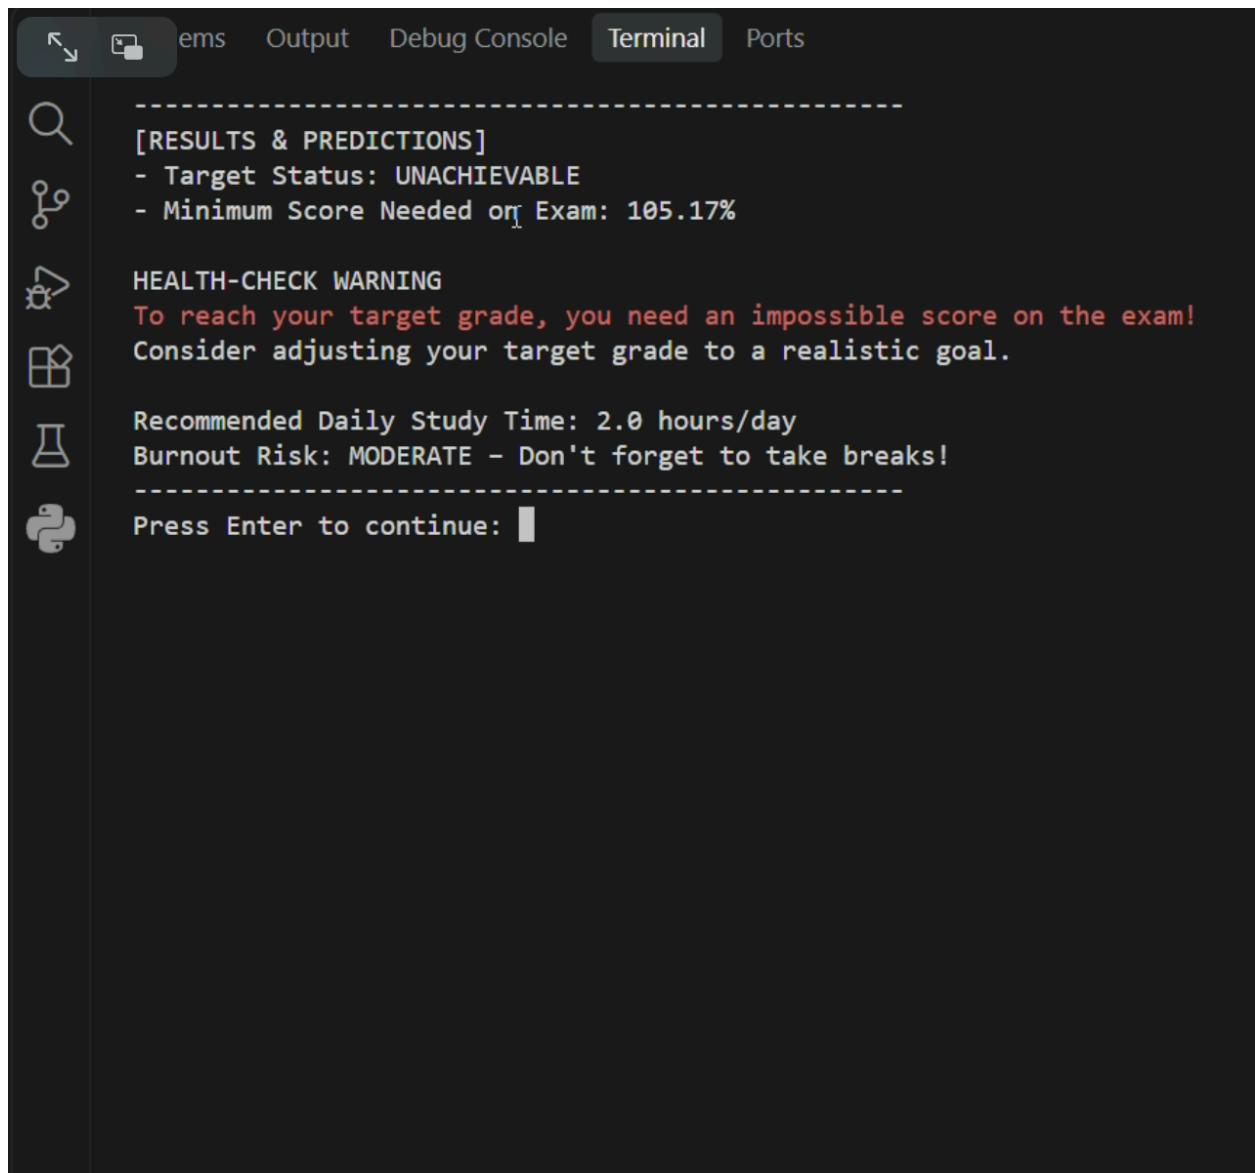

- Subject Name
- Subject Grade
- Target Grade
- Difficulty (1-5) with 5 being the highest
- Days Left until Exam

Outputs

↶ ↷ 📄 ems Output Debug Console Terminal Ports

|=====|
STUDYPULSE: GRADE & WELLNESS TRACKER
|=====|
Enter Subject Name: Com Sci
Enter Current Grade (%): 83.5
Enter Target Grade (%): 90
Enter Remaining Exam Weight (%): 30
Enter Difficulty Level (1-5): 3
Enter Days Left Until Exam: |

The image shows a VS Code terminal window with the 'Terminal' tab selected. The output text is as follows:

```
-----  
[RESULTS & PREDICTIONS]  
- Target Status: UNACHIEVABLE  
- Minimum Score Needed on Exam: 105.17%  
  
HEALTH-CHECK WARNING  
To reach your target grade, you need an impossible score on the exam!  
Consider adjusting your target grade to a realistic goal.  
  
Recommended Daily Study Time: 2.0 hours/day  
Burnout Risk: MODERATE - Don't forget to take breaks!  
-----  
Press Enter to continue: 
```

Calculations

```
def calculate_exam_score(current_grade, target_grade, exam_weight):  
    current_weight = 1.0 - (exam_weight / 100.0)  
    earned_points = current_grade * current_weight  
    needed_points = target_grade - earned_points  
    return round(needed_points / (exam_weight / 100.0), 2)
```
